Board Member CVE Program Board of Directors

Who are we - Johnathan Kuskos

Founder @ Chaotic Good Information Security

Elected Board Member for Bug Bounty COI

Extensive offensive security experience at:

- Citadel
- Salesforce
- Bank of America
- WhiteHat Security(Acquired by Synopsys)

Who are we - Sam Erb

Security Engineer @ Google

Helps run the Google & Alphabet VRP

Two-time DEFCON Black Badge winner

Extensive live hacking event experience

Hundreds of valid bug bounty reports

Who are we - Jeff & Logan

Jeffrey Guerra

Senior Security Engineer @ GitHub

Enjoys driving fast cars on curvy roads

Logan MacLaren

Senior Security Engineer @ GitHub

Bug Bounty COI contributor & CTF enthusiast

What got you into the world of Bug Bounty originally?

Where are tools most valuable in identifying bounty worthy vulnerabilities?

Where do human efforts provide more value than automation efforts?

How do you handle burnout/overload as a program manager?

What makes a particular product or application a good candidate for a bug bounty program?

What qualities do the “best” programs have?

Something has gone very, very wrong. How do you collaborate effectively to fix the situation?

What do you think about “bounty farming”?

What advice would you give to beginning bug bounty hunters that have “put in the time” but aren’t finding anything?

If you could solve one problem relating to Bug Bounty, what would it be?

What’s the most impactful bug that you’ve seen in a Bug Bounty setting?

Q & A

Thank you!
